

The Forklift Workshop

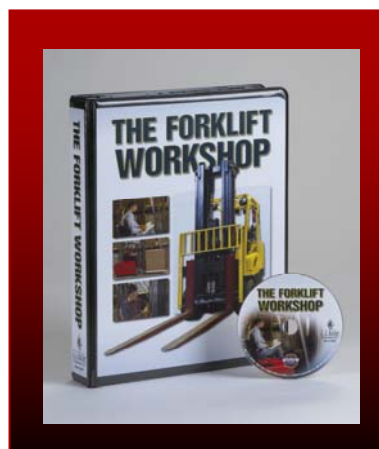

- a new, innovative approach to training forklift operators — new and veteran — on proper forklift safety procedures, as required by OSHA's 29 CFR Section 1910.178(l).

In the workshop format, your operators will watch an engaging DVD video presentation, demonstrating proper forklift techniques in action. Then, you'll be able to reinforce their learning using hands-on practice tools, exercises and learning activities.

Designed to address the training needs of forklift operators with any level of experience, this easy-to-use training program helps you fulfill the classroom and practical training requirements of OSHA 1910.178(l). Also helps you meet initial and refresher training needs and conduct effective evaluations.

The Forklift Workshop training program covers:

- Forklift basics (types, rear steering, turning radius, combined center of gravity and stability triangle, load center and controls)
- Inspecting your forklift
- Picking up a load
- Traveling with a load
- Placing a load
- Parking a forklift
- Working in a truck, trailer or railcar
- Charging and refueling
- Maintenance and modification
- Specialized units and attachments
- Hazardous locations and forklift types
- Lifting employees

Item# 427DVD \$330.00

This program includes several ready-to-use training tools:

- **(1) 35-minute closed-captioned video** - with explanation, commentary and demonstration in dynamic contemporary style.
- **(1) Trainer's Guide** - logically and clearly covers the requirements of forklift safety training and helps you develop, organize and deliver effective, memorable training.
- **(1) Trainer Tools CD-ROM** - to download, print out, use as-is, customize with company-specific information, copy into PowerPoint® presentations etc. Workshop includes:
 - Checklists for identifying hazards, incorporating workplace & forklift-specific info into training
 - Exercises for the classroom (problem solving exercises)
 - Exercises for the workplace (learning activities for forklift controls, maneuvers, battery charging)
 - Obstacle courses (7 courses that feature a variety of practical challenges)
 - Quizzes and answer keys (70 quiz questions)

The Trainer Tools CD-ROM also includes a PowerPoint® presentation/review, expanded FAQs, clip art, posters, a training log, and links to pertinent websites. Not available separately.

- **(11) Operator's Handbook** - 36-pg reference provides post-training resource.
- **(1) Wallet Card Sheet** (10 cards) — for proof of operator training.
- **(1) Forklift Safety Poster** - reminder of forklift safety to hang in a high-traffic area.
- **(1) Forklift Operator Evaluation Form** - to assess your forklift operators' skill level.
- **(1) Forklift Operator Daily Checklist** - for operators to document parts needing repair.
- **(1) Certificate of Training - Classroom** -recognizing completion of classroom training.
- **(1) Certificate of Training - Operational** -recognizing completion of hands-on training.
